

Ianian and Corinthine Epistles – Twenty Pages in Four Paragraphs

Paragraphs

Read with the New Testament, and Old of Hebrew.

I. Paul among people in a square

A single epistle then is enough to raise the people into insurrection. It only needs a militant apostle, or the Christian militant groups, all of this is Biblical beyond just history and making history, it can also be about a man in a room, smoking a cigarette. All of this then is the conjecture of point, Poincare and the maximal which then is articulation of epistle with New Testament.

II. Simple Being

Several concentric circles then of Greece and Rome, even the epistle for black power in history, which then is concentric circles of black rights in Christ's life. I call this petit-bourgeois history which is in fact important for this.

III. Poincare

Make a point, a daily life, and then criss-cross it with history and music of black songs. I mean epistles are these by Paul, in 70 AD, in Rome, at Vatican Square.
